User Interface

After downloading the Aryson Webmail Backup Tool, you will find the welcome screen as displayed below.

Software Working Process

Step 1: Download, install, and run the **HostGator/Webmail Backup Tool** on your local machine, and click Continue.

Step 2: Select **HostGator** from the left panel and then choose **Single Mode** or **Batch Mode**. Next, enter your HostGator credentials.

Step 3: Here, you can **select folders** as per the backup requirements and then click **Next**.

The screenshot displays the Aryson Webmail Backup Tool (Demo) interface. The window title is "Aryson Webmail Backup Tool (Demo)". The menu bar includes "Menu", "Buy", "Tools", and "Help". The main heading is "Backup Email from Webmail Email Clients to Various File Formats & Email Clients", with a "Live Chat" button and a menu icon to the right. The central area shows a hierarchical tree structure of email folders. The root is "Imap_Id", followed by a date "10-06-2022 11-52". Underneath, there are folders: "All Mail" (checked), "Drafts", "INBOX" (checked), "A", "A,B", "B,C", "B", "C", "D", "E", "F", "G", "H", "J", and "K". The folders "All Mail", "INBOX", and the sub-tree starting with "D" are highlighted with red boxes. At the bottom, there are "Back" and "Next" buttons, with the "Next" button highlighted in red.

Understanding and Navigating Email Backup with Tree Structure

- The tree structure refers to the organized and hierarchical representation of your email account's folders and subfolders.
- Expand and collapse the folders in the tree to navigate the specific folders or subfolders and select the folders you wish to include in the backup.
- Click on the Next button to move ahead, where you will find the options to select file format and email client to back up your source data.
- Expand and collapse the folders in the tree to navigate the specific folders or subfolders and select the folders you wish to include in the backup.
- In case you want to select another ID, then click on the Back button.

Step 4: From the drop-down menu, choose the saving format. We are going with the PST file format.

Step 5: Click on the **Destination** button to assign a location to save the resultant file, and click **Next**.

Step 6: Choose the features, such as:

- **Remove Duplicate Mail:** By choosing this option, you can skip the identical email on the basis of Subject, Body, From, and To.
- **Skip Previously Migrated Emails:** This feature allows you to migrate emails that were not transferred before, which helps to prevent duplicates.
- **Free Up Server Space:** It helps users to free up space on their webmail server.
- **Migrate Emails Without Attachment Files:** Select this option if you want to migrate emails without their attachments.
- **Save Attachment in Folder:** This feature helps you save attachments into a different folder.

The screenshot displays the 'Aryson Webmail Backup Tool (Demo)' window. The main title is 'Backup Email from Webmail Email Clients to Various File Formats & Email Clients'. A 'Live Chat' button is visible in the top right. The interface is divided into several sections:

- Remove Duplicate Mail on the basis:** This section is highlighted with a red border. It includes a checked checkbox and an information icon. Below it are four unchecked checkboxes: 'Subject', 'Body', 'From', and 'To'.
- Skip previously migrated:** An unchecked checkbox with an information icon and a 'More Info' link.
- Free Up Server Space:** A checked checkbox with an information icon.
- Migrate Emails Without Attachment Files:** A checked checkbox with an information icon. Below it is a section for 'Save Attachment in folder' with a text input field and a 'Path' button, both with information icons.
- Date Filter:** An unchecked checkbox with an information icon, followed by 'Start Date' and 'End Date' input fields.
- Custom Folder Name:** An unchecked checkbox with an information icon and a text input field.
- Split resultant PST file:** An unchecked checkbox with an information icon, followed by a 'Split PST' dropdown set to '1' and a file size dropdown set to 'MB'.

At the bottom of the window, there are 'Back' and 'Next' buttons.

Step 7: If you want to backup specific emails according to **date range**, then select the Date Filter option. Also, you can assign a desired name for your file by using the **Custom Folder Name** feature.

The screenshot shows the 'Aryson Webmail Backup Tool (Demo)' window. The main title is 'Backup Email from Webmail Email Clients to Various File Formats & Email Clients'. The interface includes a 'Live Chat' button and a menu with 'Buy' and 'Tools' options.

The configuration area is divided into several sections:

- Remove Duplicate Mail on the basis:** Includes checkboxes for Subject, Body, From, and To.
- Skip previously migrated:** A checkbox with a 'More Info' link.
- Free Up Server Space:** A checked checkbox.
- Migrate Emails Without Attachment Files:** A checked checkbox.
- Save Attachment in folder:** A checked checkbox with a text input field and a 'Path' button.
- Date Filter:** A checked checkbox with 'Start Date' (Sep 1, 2023) and 'End Date' (Sep 20, 2023) fields.
- Custom Folder Name:** A checked checkbox with a text input field containing 'testing'.
- Split resultant PST file:** A checkbox with a numeric input field set to '1' and a unit dropdown menu set to 'MB'.

Navigation buttons 'Back' and 'Next' are located at the bottom of the interface.

Step 8: In case you need to divide the PST file into smaller PST files, select **Split resultant PST file** and click **Next**.

The screenshot shows the 'Aryson Webmail Backup Tool (Demo)' interface. The main title is 'Backup Email from Webmail Email Clients to Various File Formats & Email Clients'. The interface includes a 'Live Chat' button and a menu icon. The main configuration area is divided into several sections:

- Remove Duplicate Mail on the basis:** Includes checkboxes for Subject, Body, From, and To.
- Skip previously migrated:** Includes a checkbox and a 'More Info' link.
- Free Up Server Space:** Includes a checked checkbox.
- Migrate Emails Without Attachment Files:** Includes a checked checkbox.
- Save Attachment in folder:** Includes a checkbox and a 'Path' input field.
- Date Filter:** Includes a checked checkbox, 'Start Date' (Sep 1, 2023), and 'End Date' (Sep 20, 2023).
- Custom Folder Name:** Includes a checked checkbox and a text input field containing 'testing'.
- Split resultant PST file:** This section is highlighted with a red border and contains a checked checkbox for 'Split PST', a numeric input field set to '35', and a dropdown menu set to 'MB'.

At the bottom of the interface, there are 'Back' and 'Next' buttons. The 'Next' button is highlighted with a red border, indicating the next step in the process.

Step 9: After clicking the Next button, the software will backup all your selected data in a PST file. Click on the **Download Report** button to analyze the backup process.

The screenshot displays the Aryson Webmail Backup Tool (Demo) interface. At the top, there is a navigation menu with 'Menu', 'Buy', 'Tools', and 'Help'. Below the menu, the main heading reads 'Backup Email from Webmail Email Clients to Various File Formats & Email Clients'. A 'Live Chat' button is visible on the right. The central part of the interface features a table with the following data:

Source	Destination	Start time	End time	Total no. of	Skipped mails	Status
	PST	Thu Sep 21 14 17 30 IS...	Thu Sep 21 14 17 40 IS...	0	0	SUCCESS

At the bottom of the interface, there are three buttons: 'View', 'Home', and 'Download report'. The 'Download report' button is highlighted with a red border.
